Datasheet

# **OVERVIEW**

The SA6350 accelerometer is ideally suited for vibration monitoring of gas turbines and other high temperature machines. The piezoelectric accelerometer is integrally connected to a charge amplifier. When used with the Metrix 5580 Smart Signal Conditioner or SW5580 Smart Vibration Switch for accelerometers, a 4-20 mA signal proportional to acceleration or velocity is available. The accelerometer is electrically isolated from the stainless steel case and cable.

# CE CUS

# **FEATURES**

- Piezoelectric accelerometer
- Case isolated

# **APPLICATIONS**

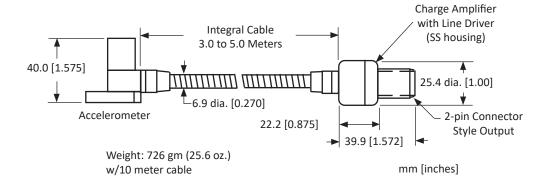

- Gas turbines
  - Aero and marine derivative
  - Industrial frames
- High temperature furnace fans
- · Hot oil pumps

# **SPECIFICATIONS**

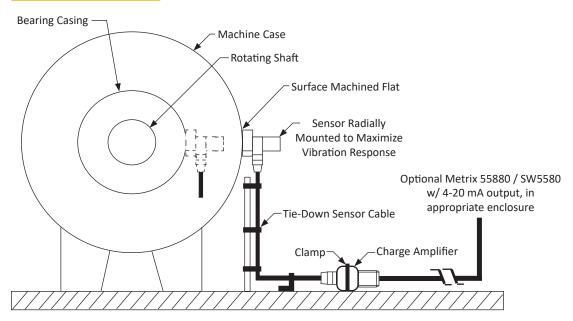

| Sensor                           | Piezoelectric accelerometer with remote charge amplifier / line driver  |
|----------------------------------|---|
| Frequency Response               | ±3.0 db from 5.0 Hz to 10,000 Hz  |
| Case Material                    | Stainless steel   |
| Sensitivity                      | 100 mV/g (10.2 mV/m/s²) @ 100 Hz,<br>+/- 5% For 20°C to 30°C (Test Range),<br>For -40°C to 325°C (Operating Range)<br>see Sensitivity vs. Temp. |
| Sensitivity vs. Temp.            | +/- (5% + (0.05% x °C)) from 25°C   |
| Charge Amplifier Case            | Stainless steel   |
| Maximum Vibration Input          | 50 g's, peak  |
| Output Impedance                 | 1000 Ω  |
| Field Wiring                     | See Ordering Option "C"   |
| Shock Limit                      | 5,000 g peak  |
| Temperature Range                | Accelerometer: -40°C to +325°C<br>Cable: -40°C to +260°C<br>Charge Amplifier: -40°C to +120°C   |
| Cable                            | Low noise cable   |
| Cross Axis Response              | Less than 5%  |
| Power                            | 20 to 30 Vdc, 2 to 6 mA<br>Not polarity sensitive   |
| Mounted Resonance Frequency      | 25 kHz  |
| Sealing                          | Accelerometer: hermetic   |
| Isolation                        | 500 Vrms, circuit to case   |
| Agency Approvals                 | CSA and NRTL/C certified for Class<br>I, Div. 1(Grps A-D), ATEX Ex ia IIC T1<br>Ga Ta: -40°C to 325°C   |
| Electromagnetic<br>Compatibility | CE Mark   |

# Isolation Option 100283\*

3-hole triangle base pattern

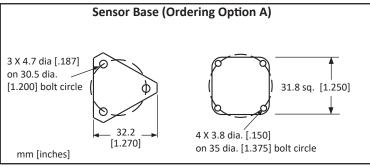

# Isolation Option 100534\*

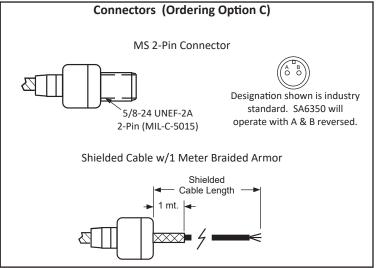

# 4-hole triangle base pattern

#### Note:

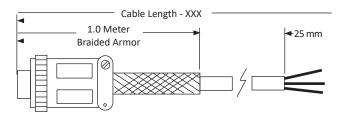

\* Isolation options 100283 and 100534 provide electronic isolation from the monitored machine while coupling mechanical vibration to the SA6350 accelerometer. This kit consists of a base plate, a ceramic isolator plate and mounting hardware. Use these kits in applications where electrical noise from the monitored machine could be coupled directly to the accelerometer.
